SKILLS

Programming Language

- C#
- Java
- Dart
- HTML/CSS/JavaScript

Database

- MS SQL
- MySQL

Mobile

- Flutter
- Java

Frameworks/Platform

- JSP/Servlet
- ReacJS
- ASP.NET Core
- RestFull API / gRPC

Software Architecture

- Microservices
- Model-View-Controller
- Clean Architecture

Other Technical Skills

- Glt , Github, GitLab
- CI/CD Pipeline
- MS Office, Adobe
- Jira , Trello

OBJECTIVES

- I aim to secure a backend developer role to gain hands-on experience and grow into a mid-level position. I am eager to learn, work in a professional environment, and contribute effectively to real-world projects.
- My long-term goal is to become a proficient fullstack developer within 3-4 years, mastering both backend and frontend technologies.

WORK EXPERIENCES

Backend Developer Intern

FPT SOFTWARE | **May 15, 2023 - August 18, 2023**

Trained in .NET technologies, including LINQ, EF Core, and Design Patterns for building scalable applications. Gained hands-on experience with JWT Authentication for secure API access, along with best practices in database management and code optimization.

EDUCATION

Bachelor of Software Engineering

FPT UNIVERSITY | **2019 - 2024**

PROJECTS

Viet Nam Concept | **DEC 2024 - JAN 2025**

- **Website** : VietnamConcept - https://vietnamconcept.com
- **Brief:** A web development project focused on UI/UX design for an architecture company. The website emphasizes a visually appealing interface while implementing key backend logic for managing posts, company information, images, and architecture projects.
- **Team Size** : 1
- **Tech:**
  - Frontend : ReactJS, Tailwind
  - Backend : C#, .NET Framework , MySQL
- **Role** : Fullstack
- **Main Tasks:**
  - Developed frontend with ReactJS & Tailwind, ensuring a responsive UI/UX.
  - Built backend with ASP.NET & MySQL, managing posts, images, and projects.
  - Deployed on VPS using Docker for stability and scalability.

CERTIFICATES

English Certificate -TRS601
06/2021

ACTIVITIES

XUAN AM AP EVENT - FPT UNIVERSITY
Event planner | **Nov 2020 - FEB 2021**

The event aims to help homeless people in Ho Chi Minh City

NetVeXanh Contest | JUL 2024 - SEP 2024

- **Brief:** Developed a web and mobile platform for the "Nét Vẽ Xanh" art contest in Ho Chi Minh City, enabling contest setup, entry management, and online submissions, along with a judge scoring system via a mobile app.
- **Team Size** : 4
- **Tech:**
  - : ReactJS
  - Backend : C#, .NET Framework, SQL Server
  - Mobile : Flutter
- **Role** : Fullstack
- **Main Tasks:**
  - Built backend APIs with C# & SQL Server to handle contest management.
  - Developed frontend using ReactJS for an intuitive user interface.
  - Created a Flutter mobile app for judges to score entries efficiently.
- **URL** :

https://github.com/Net-ve-xanh-capstone/NetVeXanhApi.git

Web Recruitment | June 2023 - August 2023

- **Brief**: The website serves as a job application management platform where users can submit their CVs. Simultaneously, it provides companies with tools to manage the process of receiving CVs and scheduling interviews for potential applicants
- **Team Size** : 5
- **Tech**:
  - Backend : C#, .NET Framework, SQL Server
  - Fronend: ReactJS
- **Role** : Backend
- **Main Tasks**:
  - Built backend APIs with C# & SQL Server to handle contest management.
  - Integrated JWT authentication for secure user access.

TRANSPORT SYSTEM | JAN 2023 - MAR 2023

- **Brief:** Developed a Java-based web API for bus booking management, handling ticketing, services, and payments with secure authentication and efficient data processing.
- **Team Size** : 4
- **Tech:**
  - Backend: Spring Boot, RESTful API, JPA/Hibernate
  - Fronend: ReactJS
- **Role** : Backend
- **Main Tasks:**
  - Designed and implemented RESTful APIs using Spring Boot for booking, payment, and user management.
  - Developed database models with JPA/Hibernate, ensuring efficient data storage and retrieval.
  - Deployed the application to Heroku, ensuring scalability and reliability.
